## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 1, 3-10 & 12-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mikoshiba et al. (# US 2002/0170126).

Mikoshiba et al. discloses an ink jet recording recoding method ejecting ink composition on the recording medium, wherein recording medium is paper, coated paper, or textile ([0199]). The ink composition comprises a dis-azo compound (see Abstract), which has a general formula as shown below (see Abstract):

A compound which can be used as a dye and is represented by the following general formulae (I), (II) and (III). In the general formulae, A and B each independently represents a monovalent heterocyclic group bonded to an azo group by a carbon atom of the monovalent heterocyclic group; m and n each independently represents one of 0 and 1; and M represents one of a hydrogen atom and a monovalent positive ion.

Mikoshiha et al. differs from the claim of the present invention is that the two or more substituents having a pKa value in water of -10 to 5 and which has an oxidation potential more positive than 0.8 V (vs SCE).

However, Mikoshiba et al. teaches the same coloring compound as applicant's claimed invention, therefore it obvious that it has same property as applicant claimed. Therefore Lehmann et al. obviously discloses the pKa value in water of -10 to 5 and has an oxidation potential more positive than 0.8 V.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Manish S. Shah whose telephone number is (571) 272-2152. The examiner can normally be reached on 8:00am-4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen D. Meier can be reached on (571) 272-2149. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
